## ANNOUNCEMENT OF PHOTOGRAPHY CONTEST

While our leaders negotiate the political reunion of our country with the encouragement and active support of the international community, the climate in which this effort is pursued is one of intensified division of the people of Cyprus. This is due to the very long physical and political separation of the two largest communities, but also to the revival of nationalism on both sides of the dividing line. This situation undermines our long-standing objective of seeing cooperation and a common vision for our united country.

Having these objectives at the forefront of its agenda, the New Cyprus Association has organized a photographic competition with the following theme:

### <<CYPRIOTS OF TOMORROW - YES to the vision of the common future>>

The committee established to oversee the competition is represented by the following organizations: IKME – Socio-political Studies Institute, the Association of Social Psychologists and the Turkish-Cypriot Photographic Society.

The purpose of the competition is to contribute towards the creation of conditions that will promote the acceptance of a viable solution. The competition attempts to do this through the artistic and creative vehicle of photography, due to the great potential of visual media to reflect the theme we are aiming to promote: a vision for our common future.

Following the completion of the competition other activities will be undertaken in order to present the photographs to the public. The organizational committee has approved the terms and conditions of the competition (attached) and it will set up a judging panel made up of specialists in this area.

The organizational committee asks all professional and amateur photographers to take part by submitting photographs which fall within the scope of the competition's theme. It also asks other organizations with the same objectives to contribute towards the success of the competition by promoting it among their members.
